

Huynh Tan Phu (Mr. Phu)

Personal Details

- Position Applied: Golang Developer – Ho Chi Minh
- Date of Birth: 1985
- Marital Status: Married
- Citizen of: Viet Nam

Consultant's Overview

- 19+ years of experience in technology, specializing in backend development across healthcare, legal tech, ERP, e-commerce/ advertising platforms, etc.
- Strong in Golang (5 years), PHP, and .NET; Familiar with microservices (~2 years), Kubernetes (~2 years), API design, AWS, Docker, and CI/CD setup
- Experience in building systems from scratch at Lawtech and SearchEye, also leading a 10-member team at Asoft
- Express ideas effectively in English with a slight Vietnamese accent, meeting directly with global stakeholders
- Looking for: A new environment to leverage and enhance his skill set

Summary

- Senior Software Engineer with years of experience building enterprise applications and compliance platforms from scratch. Specialized in backend development using Go, PHP, and .NET, with proven expertise in KYC/AML systems, identity verification, and regulatory compliance
- Successfully architected ERP systems, healthcare platforms, and legal tech solutions for international clients across the US, UK, Canada, and Japan

Work History

Apr 2024 – Present

Senior Software Developer – Lawtech Software (Part of tmGroup, UK)

Duties:

- Architected and developed a comprehensive KYC/AML compliance verification platform for legal firms with automated identity verification workflows, biometric checks, and regulatory PDF report generation
- Developed an ongoing PEP and Sanctions monitoring system with automated daily screening, MLRO weekly reporting, and real-time risk profile change detection integrated with the KYC6 API
- Built identity and business verification services integrating multiple providers (KYC6, LexisNexis, Veriff, MyID) for biometric verification and KYB checks with Companies House and Kompany APIs
- Designed RESTful API architecture using Go/Gin with integrations for legal practice management systems (Actionstep, Clio), payment processing (Stripe), and document signing (BoldSign)
- Implemented automated compliance monitoring infrastructure with cron-based scheduled tasks, PostgreSQL database design, and automated notification systems
- Developed security and access control systems with RBAC, 2FA authentication, comprehensive audit logging, and secure document storage with AWS S3

- Tech Stack: Go, Gin, PostgreSQL, GORM, KYC6, LexisNexis, Stripe, BoldSign, AWS S3, Docker, CI/CD, Swagger, Prometheus

Apr 2022 – Mar 2024

Senior Software Developer – SearchEye (Canada)

Duties:

- Worked in Agile, sprint-driven environment to create solutions for business challenges
- Collaborated on technical approaches for large, complex features
- Participated in Code Review and QA sessions to maintain product integrity
- Resolved bugs and issues in staging and production environments
- Mentored junior developers on Laravel and technology stack
- Tech Stack: Golang, PHP, Laravel, Vue 2, TypeScript, PostgreSQL, MySQL, Docker, CI/CD

Apr 2020 – Mar 2022

Senior Software Developer – WCMS Solutions (USA)

Duties:

- Built products from client requirements using Laravel, microservices (gRPC), and SSO integration
- Developed responsive mobile/web applications with Bootstrap
- Key Projects: Hako-Popup (advertising platform – Japan), Kanabell (e-commerce – Japan), Wambi (healthcare platform – USA)
- Tech Stack: PHP, Laravel, Golang/gRPC, Vue.js, Python, Ruby on Rails, MySQL, MongoDB, GraphQL, AWS, Docker, CI/CD

Aug 2006 – Mar 2020

Senior Software Developer | IT Team Lead – ASOFT Corporation (Vietnam)

Duties:

Jul 2012 – Mar 2020: ASOFT Corporation

- Built and developed ERP modules (sales, warehouse, HR, finance, CRM) using .NET
- Led development team, researched new technologies, and improved processes
- Progressed from Developer to Team Leader to Project Manager over 7+ years
- Tech Stack: C#, ASP.NET, MVC, SQL Server, PHP, Laravel, Golang, MySQL, GCP

Aug 2006 – Jul 2012: GreenSun Software Solution (ASOFT)

- Developed ERP modules and designed system architecture
- Led team of developers (2010-2012)
- Created coding guidelines, performed testing, and optimized system performance
- Tech Stack: C#, ASP.NET, PHP, Java, SQL Server, MySQL, Oracle PL/SQL, JavaScript
